

Going Green With

Did You Know?

Production of one ton of paper requires about 10,000 kWh of electricity.

That is enough to power a typical North American home for about a year!

How can Blackboard help?

Blackboard provides you all of the tools necessary to take your course paperless. Assignments, Assessments, and more.

Contact Dave Pratt or the IS HelpDesk for assistance.

Together we can make a difference!

"Going Green" is an effort to lessen one's impact on the environment, by reducing, re-using and recycling.
