

21 questions? Yes! Remember your last two PNC labs were all about dispensing meds plus Halina covered some meds scattered throughout various lectures. Review your notes to recapture what was covered during those lectures & return demonstrations! Let's try something different. I will list some vocab words and/or concepts. Based on your experience with past exams, predict how they might be used in a question.

Aspirate with plunger

Speed of absorption

Ear pinna

Acromion process

Lateral femoral condyle

Enteric coated

Needle lengths for various injection sites

Watery vs viscous- gauge?

Drip chamber calibration

Infiltration

Macro vs micro drip

Onset of action

Peak plasma level

Drug half-life

Mixing meds (vial & ampule)

See what you can come up with and the responses you get back from your peers.
