

STUDENT ONLINE REGISTRATION

Hints and Tips:

Session and Year:

You must *select the appropriate session (and year)* when you first enter SOLAR registration. You must also select whether you are registering for Undergraduate courses (UNDG) or Graduate Level courses. To change from one session to the next, you must enter the correct session and year in the Current Options Settings Box.

Prerequisite Courses:

You should check in advance to ensure that your academic record shows that you have met all the prerequisites for any courses you plan to take. If you do not, coordinate in advance with your advisor. This applies especially for transfer students who have taken equivalent courses that do not show in your current academic record with the specific course number listed as the prerequisite. It also applies to courses for which you may have “tested out.”

Lab Courses:

If you are taking a course that includes a lab section, *you must register for the lab section first*. You will not be able to register for the lecture section until you do so.

Wait List Courses:

If the specific course/section you prefer is already full, the system may ask if you would like to get on a wait list for that course/section (not all course/sections are wait list eligible, and there is a limit to the number of students that can join the wait list for each course/section). If you rise to the top of the wait list before the class meets for the first time, and a seat opens up for that course/section, you will automatically be enrolled in that course/section (and notified by email) if:

- *Adding this course will not create a time conflict with another course.*
- *You are not enrolled in another section of this course.*
- *You meet all the prerequisites for the course at the time of the auto-enroll.*

When you join a wait list, you will be able to list a course and section that you would like to drop if the wait listed course/section becomes available. The system will check for time and course conflicts. You will not be dropped from the enrolled course until you are successfully added to the wait listed course.
